The Ray-Pec Board of Education recognizes the need to implement the Long Range Facility Plan and gather community input as new attendance boundaries are drawn for the 2017-2018 school year. As a part of this process, an attendance boundary committee was formed composed of representatives from each current school attendance area as well as key community and staff members. The committee analyzed data, reviewed solutions, and is seeking appropriate feedback in order to make attendance boundary recommendations to the Board of Education by December of 2016. Please review the proposed boundary maps and the information included on this handout. Feedback can be provided by completing the brief survey linked below.
